

PIONEER METAL AT MINNEAPOLIS, MN

Pioneer Metal Finishing's Minneapolis, MN division was founded in 1945. The original building sat on the same property that is now the Metrodome in downtown Minneapolis. In 1961, our Minneapolis division out grew its facility and moved to its current facility located in the heart of Minneapolis just minutes from I-94. The facility features over 50,000 sq. ft. of production area specializing in anodize and bright dip anodize.

Our Minneapolis facility is Nadcap accredited and ready to serve your aerospace requirements. This facility has been approved by Lockheed Martin, Hamilton Sundstrand, Rockwell Collins, Northrop Grumman, and Aircraft Braking Systems.

THIS FACILITY HAS TWO LINES

Line 1 is Hard Anodize, Conversion Coatings, Passivating, and ARP-Etch
132" Long x 48" Deep x 28" Wide

Line 2 is Hard Anodize, Clear & Dyed Anodize, and Bright Dip
152" Long x 52" Deep x 28" Wide
